## MILANO UNICA SUSTAINABILITY PROJECT

### The main adopted standards, protocols and certifications of conformity

Consistently with the attention to removing hazardous chemicals, the Oeko-Tex® certification and the compliance with the ZDHC and DETOX standards come in the very first position.

Second is the GOTS (Global Organic Textile Standard) certification relative to the organic materials and fifth is the GRS (Global Recycle Standard) certification relative to materials derived from recycling.

The presence of businesses with corporate sustainability-oriented management systems in place is evidenced by their ISO14000, Step by Oeko-Tex® and EMAS certifications.
